

DR. YU & ASSOCIATES
PRACTICING THE FINE ART OF PERIODONTICS & IMPLANTOLOGY

DAVID H. YU, DDS, MS
NICOLE S. LITIZZETTE, DDS, MS

Some patients may not be a candidate for certain procedures due to the extensive number of post-op follow-up required. Many local surgeons may not be familiar with our specialized procedures and may not be able to provide emergency care.

We are a medical office. We respect every patient's uniqueness and health situation. We never treat a stranger. While we do try to accommodate our out-of-town patients, we will not compromise our quality of care based solely on convenience for patients. In most instances, we will need a separate appointment time for the new patient evaluation. Data like CT scans and labs may need to be done prior to surgery dates. Post-op care can usually be condensed but at least two are needed to adequately assess healing.
